### PROFILE

A highly motivated developer with a strong background in backend and frontend technologies, specializing in Java, Spring, and the MERN stack. Proven experience in building dynamic web applications and developing admin panels for managing properties and courses. Eager to start a career as a Full Stack Developer, applying strong problem-solving skills and a passion for innovation to deliver impactful solutions. Dedicated to continuous learning and excelling in fast-paced, collaborative development environments.

### Technical Skill

#### Backend

- Node.js, Express.js (API, CRUD, Multer, Cors, Socket, Bcrypt, JWT, nodemailer, Formidable, Vhost, dotenv, Winston, Morgan, Helmet, Express-Session, Nodemon, PM2, BodyParser, Redis, I18next, validator)
- Java, J2EE (Java 2 Platform, Enterprise Edition), Spring Framework (Spring Boot, Spring MVC)
- JDBC (Java Database Connectivity), Hibernate, JSP (Java Server Pages), Servlets
- RESTful APIs, Microservices Architecture

#### Frontend

- HTML, CSS, Js
- React.js (Router, Hooks, Redux, Axios, Formik, YUP, RHF, MUI, Tailwind, Chakra, Bootstrap, Helmet, Framer Motion, Modal, Date -Picker, Day.js, React map gl, i18next, pdf-renderer, jsPDF, react-pdf, Slick, Swiper, Alice React icons, Iconify, Notistack, Toast)

#### Database

- MongoDB
- MySQL

#### Development Tools

- Visual Studio Code
- Postman
- Eclipse
- MongoDB Atlas
- MySQL Workbench
- Spring Tool Suite (STS)

### Soft Skills

-  Adaptability
-  Communication
-  Creative

### Personal Details

-  DOB: 15/04/2000
-  Hobbies: Sketching, Painting

### Experience

Full Stack Developer

18/7/24 -present

#### Lotlite Technology

Pune

#### Project-1

**Project Name:** My TestLab

**Objective:** Developed an Objective Test Conducting Platform designed to facilitate online assessments, coding challenges, and skill evaluations for candidates and organizations. The platform provides a seamless experience for conducting, evaluating, and managing tests, aimed at enhancing recruitment processes and learning assessments

**Technologies used:** Linux, Nodejs, ExpressJs, React, Judge0

#### Project-2

**Project Name:** Property Management

**Objective:** Developed a comprehensive Property Management System designed to streamline the operations of property managers and landlords. This web application allows users to efficiently manage properties, tenants, and maintenance requests, enhancing overall operational efficiency and tenant satisfaction.

**Technologies used:** Nodejs, ExpressJs, MySQL, React

Full Stack MERN Developer

4/3/24 -12/7/24

#### Stacklab.in

Pune

#### Project-1

**Project Name:** Standard Operation Procedure (SOP)

**Objective:** The Print Solutions admin panel were designed to streamline the Standard Operating Procedure (SOP) creation process for employees within the printing solutions industry. The system facilitates job creation, assignment, and tracking while integrating role-based access control (RBAC) for efficient management. Additionally.

**Technologies used:** Nodejs, ExpressJs, MongoDB, React

#### Project-2

**Project Name:** This Side

**Objective:** 'ThisSide' offers a novel approach to showcasing identity through 5 dynamic categories : Resumes, Portfolios, Mini-websites, Digital Visiting Cards, and the open 'ThisSide for Everyone'. The system facilitates role-based access control (RBAC) for efficient management. Additionally.
